

REMARKS

In response to the Notification of Defective Response mailed February 14, 2008, a sequence listing, listing a sequence previously provided in Figs. 2 and 3, is submitted herewith. Entry of the sequence listing is respectfully requested.

The specification, together with Figs. 2 and 3, have been amended to include the required sequence identifier

It is urged that support for all the above amendments may be found throughout the specification as originally filed and that none of the amendments constitute new matter. Applicants further submit that the above amendments are not made for reasons of patentability and therefore do not give rise to prosecution history estoppel.

Early consideration of the subject application is respectfully requested.

Respectfully submitted,
